THE STATE OF OUR OCEANS

The ocean has always been viewed as a bottomless resource but the reality is that marine resources are finite. The ocean provides us with tremendous and often unseen economic, social and cultural benefits; it acts as a vast highway for commerce, it...

WHAT CAN WE DO?

No matter what role you play in the seafood supply chain, you can make a difference! From the fishermen out on the water right through to consumers buying seafood in their local restaurants and retailers, we can all play our part and get involved in creating a sustainable seafood industry. **Click on the link below which applies to you:**
